

CPCO's HiSTORY

CPCO was founded by twelve PCOs, all with many years of experience in the pest control. They were discussing some of the problems our industry faces on a daily basis and what could be done to solve the dilemma. After much debate, they decided that the only way to relieve our industry of these problems were to do it themselves.

In May of 1998, the Association was recognized by the Department of Agriculture. We are the Certified Pest Control Operators of Georgia, [CPCO].

As Wayne Webber has stated, "...the keys to success under the Gold Dome are our willingness to stand together and our ability to voice our concerns collectively. It takes planning and communication to ensure that we are working for the same goals. Our voice can be heard through the 'PCO Pro' and through CPCO members in a public forum. The vision is simple, Promoting Professionalism For The Pest Control Industry, and that vision still guides our every move today. We represent companies of ALL DIFFERENT SIZES from every part of the state."

WE NEED TO KEEP OUR VOICES STRONG FOR THE BATTLES OF TOMORROW
